Brand New Book ***** Print on Demand *****.Dark matter is theorized to exist in order to fulfill certain postulates that are fundamentally erroneous. However, invisible forms of high concentrations of mass do exist, though in a different context than the one theorized. Are you confused yet? The fact is; plasma in space, while is electrically charged, also has mass. All the mass in the universe is located in the protons and electrons that atoms were created from. Atoms have a low mass, because their size is typically 100,000 times larger than the parts they are made of. But plasma is free flowing. It can be dynamically compressed, electromagnetically, to extremely high-density formation. The densest mass-concentrations in the universe are of this type. All the anomalies that have been observed, are simply plasma structures, with features that can be replicated in the small in the laboratory. No magic is needed. This does not mean that the dynamics are simple. Plasma in the physical universe is as challenging in perception as the spiritual domain in the human sphere. Both are invisible, except by their effects, but they are understandable and knowable. On the same basis it becomes possible to recognize the outcome of plasma physics operating in the universe. This is important in astrophysics, because of the huge consequences that follow, when we mess up in our thinking. With the Ice Age Challenge now before us, we face two imperatives. One is to understand the physical dynamics, and to create the physical infrastructures that enable human living to continue in an Ice Age climate. The second challenge, the greater challenge, is to raise up our humanity to such height as will impel us...
