NEW TRENDS IN THE DIAGNOSIS AND THERAPY OF NON-ALZHEIMER'S DEMENTIA

Book Condition: New. Publisher/Verlag: Springer, Wien | Dementia is an acquired disorder of higher cerebral functions and cognition. Because of increasing life expectancy dementia poses a major health and socio economic problem. Alzheimer's disease accounts for 70-90% of mental decline in the elderly. Degenerative non-Alzheimer's dementia as are responsible for 7-30%. These include a variety of disorders clinically characterised by progressive cognitive dysfunction often combined with focal neurological deficits, e.g. Parkinson-plus syndromes, Lewy body dementia, lobar and multisys...

Reviews

This pdf may be worth a read through, and much better than other. It is really basic but unexpected situations inside the 50 percent of your publication. I am delighted to let you know that this is basically the very best publication i have got read within my individual existence and can be the best pdf for ever.

-- **Linwood Reichel**

This publication is definitely worth buying. It typically is not going to price an excessive amount of. I found out this publication from my i and dad recommended this ebook to find out.
